

**FIA FORMULA E WORLD CHAMPIONSHIP
ROUND 7&8 - BERLIN E-PRIX 30 APRIL - 3 MAY 2026**

From: The Stewards
To: All competitors and drivers

Bulletin no. 1
Date: 30 April 2026
Time: 15:44

The Stewards inform all Competitors

1) **Timetable version number 2 for Round 7 and version number 1 for Round 8** is valid.

2) The **extrication exercise** will take place in the respective Team garage on Friday 1 May 2026. The Drivers will be required to perform also a SWITCH OFF AND RED CAR RESET test and be able to follow the procedures needed to reset the car from the driver´s position.

18.30 hrs – N°23 - Norman NATO / NISSAN FORMULA E TEAM

19.00 hrs – N°33 - Dan TICKTUM / CUPRA KIRO

One set of tyres must be kept out of the Parc Fermé and be delivered to the Tyre Parc Fermé within the next 15 minutes after the exercise is concluded for your driver.

3) The **time penalty conversion** for penalties imposed during the last two laps or after the end of the race in accordance with **Article 16.3** will be as follows:

The time penalty will be as follows:

Drive Through	25 Seconds
10 second Stop and Go	40 Seconds

4) The **summary of mandatory media activities** is attached for your information.

5) The attached **Hankook Tire Spec & Allocation & Minimum tire pressure measurement** is valid for the 2025-2026 FIA Formula E World Championship - Berlin E-Prix.

6) The following list of **User Manual / Guide from FIA Suppliers** is valid for the 2025-2026 FIA Formula E World Championship - Berlin E-Prix:

7) The minimum PIT IN / PIT OUT time for the Competitors during the Groups in the qualifying practice session according to Article 33.2 Par. 2 of the Sporting Regulations of the 2025-2026 FIA Formula E World Championship is **100 seconds** for the 2025-2026 FIA Formula E World Championship - Berlin E-Prix.

8) On behalf of the FIA Safety Department, the Stewards, under their authority granted by Art. 11.7 of the FIA International Sporting Code, allow drivers to wear gloves without knuckle protection by refraining from sanctioning any breaches of appendix L, Chapter III, Art. 2, "Gloves with knuckle protection", during the 2025-2026 FIA Formula E World Championship - for the above mentioned E-Prix. (see extract below)

Extract of Article 2, "Flame-resistant clothing", of Chapter III, "Drivers' Equipment", of Appendix L to the ISC

2. Flame-resistant clothing

...

Drivers participating in any competition of the championship listed below must wear gloves with knuckle protections, homologated to the FIA 8856-2018 standard (Technical List No 74):

Formula E (from Season 11)

9) the following officials will be appointed judges of fact:

Startline Marshalls	
MÜLLER, Marius	MALLO, Antoine
FAIZANT, Alain	KOCSIK, Balazs
DEHNHARD, Lisa	KOCH, Carsten
FUNKE, Gabriele	CHANTREAU, Olivier
MOGK, Hendrik	CAPIOMONT, Michel
NITSCH, Sylvia	BEYER, Jürgen
ORTFELD, Kai	MALLO, Antoine

Start Tower		Finish Tower	
Sebastian Achilles		Lars Busch	

For Pit entry line		For Pit exit line	
Anja NOLLEN		Laura SCHELP	

SC line 1		SC line 2	
Anja NOLLEN		Laura SCHELP	

Pit lane Marshals	
MÜLLER, Marius	MALLO, Antoine
FAIZANT, Alain	KOCSIK, Balazs
TROCHE, Leon	KOCH, Carsten
FUNKE, Gabriele	CHANTREAU, Olivier
MOGK, Hendrik	CAPIOMONT, Michel
NITSCH, Sylvia	BEYER, Jürgen
ORTFELD, Kai	SCHIDZICK, Sascha
SIPPACH, Vanessa	SCHIDZICK, Lena
PFEIFFER, Florian	

For the pits stop (including unsafe release)	
STARK, René	HEIGL, Kilian
KUNERT, Stefan	HOING, Jona
KUNERT, Lukas	HURSHE, Zakaria
BÖHLEFELD, Lukas	REHNERT, Oskar
BASIC, Lucas	WEISHAUPT, Ralph
TAMM, Sebastian	JUHRE, Javier
DRESCHER, Mirko	JANKOWSKI, Matthias
BENACK, Peter	EISELT, Paulina
WINZER, Christiane	HANSCHKE, Ingo
MATTERN, Jörg	WOLF, Milena
GUGGER, Leon	MÜLLER, Aiden

NEUBAUER, Vanessa	

<i>Safetycar Co Driver</i>

FEDERATION INTERNATIONALE DE L'AUTOMOBILE

FE S12 Berlin – Tire Spec & Allocation

- Race event : FIA Formula E S12 Rd7,8 Berlin
- Date : May 1st – 3rd 2026
- Tire Spec

Tire specification	Front axle	Rear axle
Name of product	Hankook ION Gen3.5 Evo	
Size	255/40R18	315/40R18
Optimum Rim Width	10 J	12 J
Minimum Tire Pressure	1.20 bar	1.20 bar
Maximum Tire Pressure	2.70 bar	2.70 bar
Maximum camber	-4.0 °	-4.0 °
Minimum camber	0.0 °	0.0 °

- Minimum tire pressure: Tire pressure is measured from the beginning of the session when the wheels are fitted to the vehicle until the end of the session + within the first 30 minutes of the parc ferme.
- Maximum tire pressure : Tire pressure, measured at every Pit Out AND until a first valid measurement has been received from the TPMS sensor during SKD, FP, and Q sessions, must not exceed the values specified in the chart. For races, the maximum pressure is measured just before the start of the race when the car is moving to its grid position (AND until a first valid measurement has been received from the TPMS sensor) and at Pit Out (AND until a first valid measurement has been received from the TPMS sensor) only if an intervention has been made on the tire.

- Tire Allocation for the Berlin rounds will be 3 sets of new tires per race number. (6ea Front, 6ea Rear tires)

Tire Parc Ferme	Open	Close
Thursday (Apr 30th_Prep of the Event)	14:00	17:00
Friday (May 1st)	8:30	18:00
Saturday (May 2nd)	8:45	30min after race parc ferme opens
Sunday (May 3rd)	8:45	All tires must be return after race

The **Pressure measurement** is done at any time and in real-time when the car is running using the provide common TPMS system supplied by the appointed FIA Tire supplier – Hankook.

The TPMS system is providing an absolute pressure measurement.

To calculate the relative pressure, and check the pressure is above the minimum threshold, the competitor needs to subtract the current atmospheric pressure provided by the official timekeeper.

This Atmospheric pressure can be read

- On the weather page of the official timing TV screen
- On the V2 protocol from the official timing system
- It is sent in live to the car when running on a track, using the transponder loops. The official atmospheric pressure is received on the message 0xCA when the car is going over a timing loop.

The reference measurement is then given by : **Tire pressure = TPMS sensor reading – official atmospheric pressure from timekeeper.**
