Formula E (from Season 11)

9) The following officials will be appointed **judges of fact**:

<i>Startline Marshalls</i>	
Braulio López	Sebastian Candelaria
Carlos Guadarrama	Victor Parada
Danna Vargas	Victor Vallejo
Jonathan Espinoza	Dafne Jurado
Manuel Rivera	Melisa Solorzano
Renata Tielve	Gerardo Oliva
Rodrigo Cuevas	Liliana Bautista

<i>Start Tower</i>	<i>Finish Tower</i>
Ana Montero	Alán Chávez

<i>For Pit entry line</i>	<i>For Pit exit line</i>
Braulio López	Jonathan Mejorado

<i>SC line 1</i>	<i>SC line 2</i>
Antonio Naim	Carlos Hernández

<i>Pit lane Marshals</i>	
Braulio LOPEZ	Sebastian Candelaria
Carlos Guadarrama	Victor Parada
Danna Vargas	Victor Vallejo
Jonathan Espinosa	Dafne Jurado
Manuel Rivera	Melisa Solorzano
Renata Tielve	Gerardo Oliva
Rodrigo CUEVAS	Liliana Bautista
Diana Carolina Tentacludio	Jonathan Mejorado

<i>Pit lane Observers</i>	
Jesus Vargas	Victor Parada

<i>For the pits stop (including unsafe release)</i>	
Jesus Vargas	Victor Parada
Renata Tielve	Rodrigo Cuevas

<i>Safetycar Co Driver</i>	
Kevin Salgado	

<i>Pitlane Observation</i>	
Roger FERRER (FIA)	Rodrigo Almanza

FE S12 Mexico – Tire Spec & Allocation

- Race event : FIA Formula E S12 Rd2 Mexico
- Date : January 7th – 10th 2026
- Tire Spec

Tire specification	Front axle	Rear axle
Name of product	Hankook ION Gen3.5 Evo	
Size	255/40R18	315/40R18
Optimum Rim Width	10 J	12 J
Minimum Tire Pressure	1.20 bar	1.20 bar
Maximum Tire Pressure	2.70 bar	2.70 bar
Maximum camber	-4.0 °	-4.0 °
Minimum camber	0.0 °	0.0 °

- Minimum tire pressure: Tire pressure is measured from the beginning of the session when the wheels are fitted to the vehicle until the end of the session + within the first 30 minutes of the parc ferme.
- Maximum tire pressure : Tire pressure, measured at every Pit Out AND until a first valid measurement has been received from the TPMS sensor during SKD, FP, and Q sessions, must not exceed the values specified in the chart. For races, the maximum pressure is measured just before the start of the race when the car is moving to its grid position (AND until a first valid measurement has been received from the TPMS sensor) and at Pit Out (AND until a first valid measurement has been received from the TPMS sensor) only if an intervention has been made on the tire.

- Tire Allocation for the Mexico round will be 2 sets of new tires per race number. (4ea Front, 4ea Rear tires)

Tire Parc Ferme	Open	Close
Thursday (January 8th_Prep of the Event)	14:00	17:00
Friday (January 9th)	07:30	17:55
Saturday (January 10th)	06:45	All tires must be return after race

The **Pressure measurement** is done at any time and in real-time when the car is running using the provide common TPMS system supplied by the appointed FIA Tire supplier – Hankook.

The TPMS system is providing an absolute pressure measurement.

To calculate the relative pressure, and check the pressure is above the minimum threshold, the competitor needs to subtract the current atmospheric pressure provided by the official timekeeper.

This Atmospheric pressure can be read

- On the weather page of the official timing TV screen
- On the V2 protocol from the official timing system
- It is sent in live to the car when running on a track, using the transponder loops. The official atmospheric pressure is received on the message 0xCA when the car is going over a timing loop.

The reference measurement is then given by : **Tire pressure = TPMS sensor reading – official atmospheric pressure from timekeeper.**
